Education

Sept., 1979 to April, 1983:

B.Sc. degree, University of British Columbia - Faculty of Science, Department of Geology.

Continuing Education:

Terrain Mapping '95 (CE 2304).

Basic Principles of Forest Soils Workshop, 1996.

Soil Bioengineering For Forest Land Reclamation and Stabilization, 1998.

Selected Conferences and Technical Sessions:

11th annual Vancouver Geotechnical Society Symposium; Forestry Geotechnique & Resource Engineering, May 1997.

Terrain Stability and Forest Management in the Interior of British Columbia May 23-25, 2001
Nelson, British Columbia, Canada .

2001 Interior Forest Site Rehabilitation Workshop, April 10-11, 2001.

APEG Annual Conferences DEGIFS Technical sessions 1999, 2002, 2003.

International Conference on Landslide Risk Management, Vancouver, Canada 31 May- 3 June 2005.

Work Experience

April 1997 to
present

Principal/Consulting Geoscientist of Apex Geoscience Consultants Ltd. Responsibilities include providing expertise and professional advice in the fields of terrain stability and hydrology to the resource development sector, community water user groups and private land owners. Recent projects have included channel assessments, drainage assessments, hydrological assessments, terrain stability mapping, on-site assessments of terrain stability, landslide investigations, watershed restoration, assisted in the development of detailed drainage plan procedures, “drainage management indicators”, and hydro-geomorphological risk assessment.

- Feb. 1994 to April 1997 Consulting geoscientist through and under the supervision of Bill Wells P.Ag. and Dave Putt P.Ag. P.Geo., for Appropriate Forest Services (AFS). Work undertaken included terrain stability and soil erosion mapping and terrain stability field assessments in the Nelson Forest Region.
- June 1993 to June 1994 Employed as a senior exploration geoscientist by the B.H.P Exploration based out of Belize, Central America. Work undertaken included supervising and implementing a regional geological mapping program.
- May 1983 to March 1993. Consulting geoscientist involved in mineral exploration. Work undertaken included geological mapping, prospecting, mineral exploration activities, road construction, trenching, drilling and bulk tonnage sampling, in the Yukon, B.C. and NWT.
- 1979-1983: Employed as junior geoscientist to regional exploration programs throughout the Yukon.

Qualifications

P. Geo and Eng L. (Civil) Member in good standing with the B.C. Association of Professional Engineers and Geoscientists.

Member of the Division of Engineers and Geoscientists working in the Resource Sector (DEGIRS).
